- CRITICAL THINKING

Summery

CV Summary

Motivated and detail-oriented cybersecurity enthusiast with a strong foundation in ethical hacking, network security, and penetration testing. Skilled in using tools such as Nmap, Wireshark, and Kali Linux to identify vulnerabilities and assess system security. Eager to apply technical knowledge in real-world environments and contribute to protecting digital assets. Committed to continuous learning and staying updated with the latest trends in cybersecurity. Seeking an entry-level role where I can grow my skills and support a team in strengthening cybersecurity defenses.

Professional Experience

Cyber security specialist intern, First Quadrant Labs

06/2025 – 01/2026 | Mumbai/India

During this time, contributions were made toward a number of projects, including the following:

Establishing a Secure Remote Access Solution for Employees - Developed a secure remote access solution ensuring confidentiality, integrity, and authentication to protect corporate resources and sensitive data for remote employees.

Implementing Security into a Secure Password Manager Application - Developed a secure, cross-platform password management system with strong encryption, MFA, RBAC, encrypted backups, usability features, and compliance monitoring.

· Implementing a Secure Email Communication System - Implemented a secure email system ensuring confidentiality, integrity, and authentication of sensitive organizational data.

Use BurpSuite to capture packets and perform Host Header Injection via Repeater. - Used BurpSuite to intercept requests and perform Host Header Injection via Repeater, manipulating Host headers to identify and validate server-side vulnerabilities.

Scan for Open Redirection via Security Headers and exploit it using BurpSuite. - Identified an open redirection vulnerability using Security Headers and validated it with BurpSuite to demonstrate phishing risk.

Securing Internet of Things (IoT) Devices in Smart Home Environments - Developed a comprehensive IoT security framework to protect smart home devices from cyber-attacks, ensuring safety, privacy, and system reliability.
